

SEA and Time Machine Software Announce Partnership to Market and Distribute the Smart Suite of Products in North America

New York – December 4th, 2008 – Software Engineering of America, Inc., a leading provider of data center software solutions, has announced a partnership with Time Machine Software, Ltd., to market and distribute the Smart Suite of software in North America.

SmartProduction is an innovative software solution that dramatically reduces the batch window and increases system online time by reducing the run time and CPU resources consumption of batch jobs and applications.

Under the partnership, SEA will be the marketer and distributor of the solution in North America and will also provide 24/7 technical support for the solution. SmartProduction is a perfect complement to SEA's existing software and service expertise in batch optimization and efficiency and should add immediate value to SEA's user base in addressing some of their most critical issues.

“Our partnership with Time Machine Software is a perfect fit given both of our companies expertise in the mainframe batch market and focus on best practices”, says Jatin Thakker, Chief Operating Officer of SEA.

"We are excited about the new relationship with Software Engineering of America, a leading provider in the software industry", says Raphael Oz, CEO of Time Machine Software.

About Software Engineering of America, Inc

Established in 1982, Software Engineering of America has built a global reputation as a leader in the field of data center software solutions. SEA is one of the most successful companies in the Data Center software industry, with over 10,000 data centers of all sizes and configurations utilizing one or more of SEA's products, including 9 of the Fortune 10 as well as 85% of the Fortune 500 Companies.
